RE: APPROVAL OF OKERE COMMUNITY DEVELOPMENT
PROJECT (OKERE CITY)

It's my singular honor and privilege to approve that Okere city is a legitimate and impactful project operating in Okere parish located in adwari sub-county, otuku district.

Okere city ^{project} was founded in 2019 and it has since then become an important cornerstone upon which the socio-economic and political development of the parish is being built upon. Among many things are early childhood development centre has been established, a community hall to facilitate community dialogues and social events has been constructed, trees to protect our environment and natural ecosystems has been planted among others.

The vision of Okere community development project to lay a firm foundation for a sustainable city in future is possible but it requires massive support from all stakeholders. Here at the local level the community members have already and still continue to support the project by contributing their time, local materials

and other resources to support the project.

It is now my humble request to anyone and any organisation who believe in dreams of a better future to fully support this project because through this initiative, ~~we~~ are on a journey to create a better, prosperous and more sustainable future for our children and grand children.

Thank you.

~~Patrick~~
