

FIVE YEARS OF RADICAL RURAL TRANSFORMATION

IMPACT REPORT 2019-2024

Our Mission

To create a resilient, thriving, and self-reliant rural future by investing in people and infrastructure, and creating products and services that expand infinite opportunities and possibilities for the local communities we serve.

Our Vision

To become a leading experimental SDGs /Smart / Eco village model for Africa by 2030.

Preface

In mid-2018, I could never have imagined that what began as a deeply personal journey to reconnect with my ancestral home would evolve into what we now know as Okere City. My initial dream was modest: to make my ancestral compound more livable and meaningful for my family. Having been uprooted from my birthplace as an infant—just six months old when my father was killed during Uganda’s insurgency—I yearned to rediscover my roots and reclaim my cultural identity.

Simple acts such as widening the grass yard, installing solar lights, and drilling a borehole quickly drew the attention of neighbors. Before long, these small efforts became a spark. I began to ask myself difficult but necessary questions: What is the value of my comfort if those around me continue to struggle? How might I use my resources, talents, and networks to help build something greater than myself?

Those questions gave birth to a bold idea: to reimagine the rural dream. I remember telling an elder, “We will build a sustainable rural city here. People should not have to travel far and wide in search of opportunities. If we create opportunities at home, our people can thrive right here.” It was a radical vision, but one grounded in the belief that dignity and prosperity should not be reserved only for urban spaces.

Drawing from my experience as a development worker, I knew this dream could not be mine alone. It had to belong to the community. Trust became our most important currency. I listened. I engaged. I entrusted responsibilities to those often overlooked. I humbled myself to learn from the very people I hoped to serve. Together, we laid foundations—both literal and symbolic. We built classrooms and community halls while planting trees and growing food. Each day, we worked with the conviction that the sacrifices we made today would carve out a brighter future for our children.

Five years later, that conviction has borne fruit. With an investment of just about half a million dollars, Okere City has touched the lives of more than 10,000 rural dwellers. From providing education and healthcare to creating jobs and nurturing hope, our journey has been one of resilience and unwavering commitment.

This report tells the story of that journey. It captures both the measurable impact and the intangible transformations that have taken root in our community. None of this would have been possible without the support of visionary partners who believed in us when our dream was still just a sketch: the Segal Family Foundation, Konrad Adenauer Stiftung, Stanbic Bank, CivFund, Otuke District Local Government, Future Generations Foundation, Hope Smiles, and the PBE Foundation. Your faith has enabled us to redefine what is possible in rural Uganda.

As we look ahead to the next five years, our mission remains clear: to continue building dignified lives and sustainable futures in Otuke. In doing this, we will undoubtedly emerge as a leading experimental SDGs/Smart/Eco village model for Africa by 2030.

Ojok Okello
FOUNDER & CEO, OKERE CITY

2019-2024 AT A GLANCE

\$500K

Invested in local

WHAT PEOPLE SAY

“

In many ways, Okere City is not just a place. It is an experience of a transformational community that endeavors to implement the SDGs through their different initiatives. They are preserving culture; improving literacy rates both among the children and the elderly through the adult literacy program; promoting economic development through the Shea Butter business.

Diana Ondoga, Corporate
Investment Lead,
Stanbic Bank, Uganda

“Being with Okere City from its very beginning and witnessing its growth has shown me what a determined community can truly achieve—Okere City is not just a project—it is a living story of resilience, hard work, teamwork, and impact. It is a testament to how people, united by a shared vision and purpose, can build something extraordinary. Every milestone we celebrate is proof that rural communities have the power to shape their own future with dignity and pride.”

Maureen Agena

ICT Governance Expert
Board Advisor, Okere City

“You may need to visit Okere City one of these days and witness the wonder of the human spirit at work. Hurray! Okere City for helping your people in ways that continue to elude most common men”.

Sam Stewart Mutabazi,
Urban Development Expert

“Okere City’s 5-year journey is a story of how dedicated sustainability advocacy and action can transform a community and serve as global model for generational land restoration, Poverty eradication, and sustainable development. I am particularly excited about the project’s “Okereconomics” model of sustainable social enterprises, including education, agribusiness, and healthcare, built on the local shea butter economy”

Timothy Masembe
Sustainability Manager, United Nations
Federal Credit Union (UNFCU)
I Board Advisor - Okere City

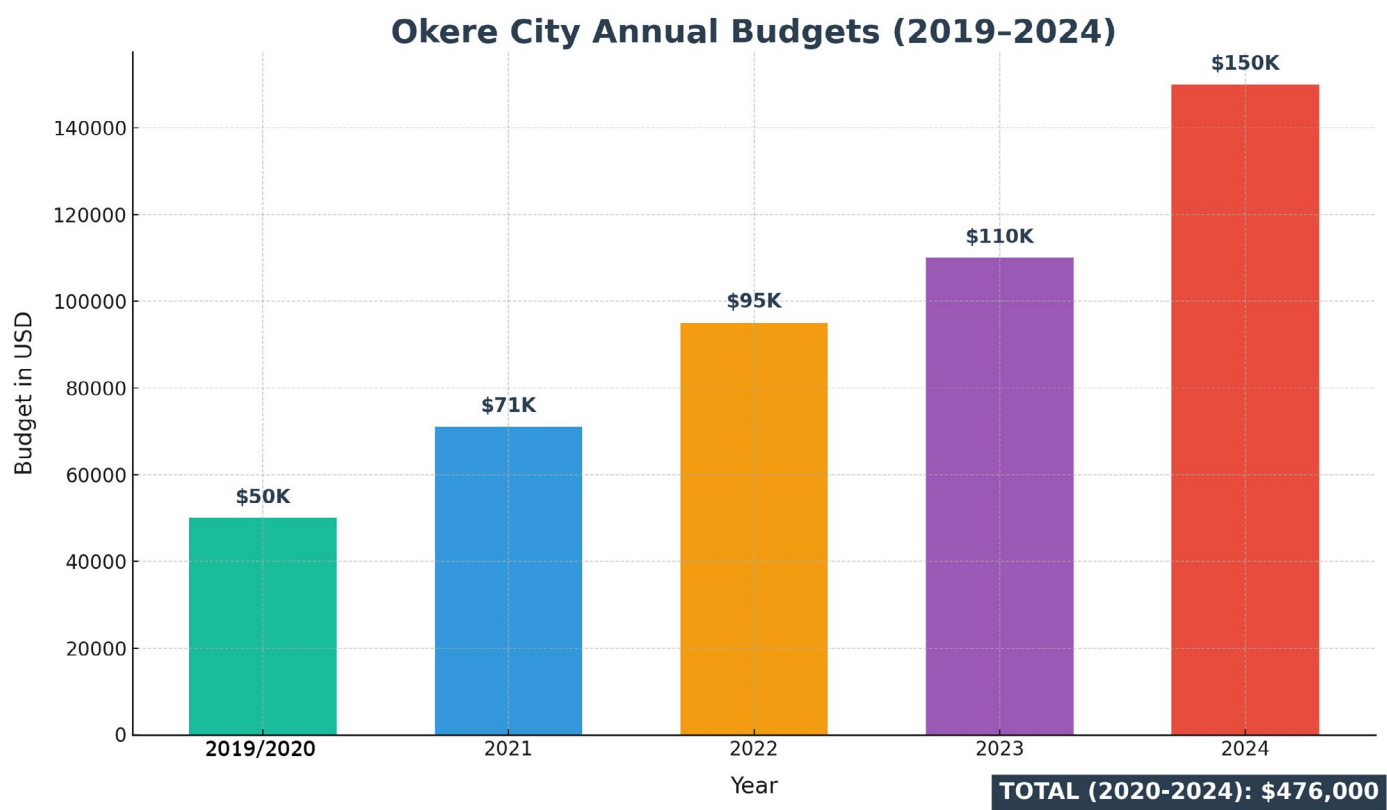

“If the mood in Okere City is anything to go by, how it pulsates with life and springs with pomp and enthusiasm, then the concept of Okere City has been bought into by the community. The spirit that binds Okere City is otherworldly.”

Anna Grace Awilli,
Poet, Writer & Vet Doctor
